

Internal Exam :Visual Programming

Duration: 1 Hour

Total Marks: 20

READ THIS BEFORE YOU START

- Write your name, class roll number and session in the designated section at the top of the answer form.
- Each question is a multiple-choice question with four answer choices. Read each question and answer choice carefully and choose the ONE best answer. Try to answer all questions.
- Attempt all 20 questions, each question carries 01 mark.

***Required**

1. Enter your Name *

2. Enter Your Class Roll No *

3. Enter Your Session *

Mark only one oval.

2016-19

2017-20

2018-21

Visual Programming

4. 1. Which of the following converts a type to a string in C#?

Mark only one oval.

- ToInt64
- ToSbyte
- ToSingle
- ToString

Visual Programming

5. 2. Which of the following options is not a Bitwise Operator in C#?

Mark only one oval.

- &, |
- ^, ~
- <<, >>
- +=, -=

Visual Programming

6. 3. Which statement is correct among the mentioned statements? i. The for loop works faster than a while loop ii. for(; ;) implements an infinite loop

Mark only one oval.

- Only i is correct
- Only ii is correct
- Both i and ii are correct
- Both i and ii are incorrect

Visual Programming

7. 4. What is the advantage of using 2D jagged array over 2D rectangular array?

Mark only one oval.

- Easy initialization of elements
- Allows unlimited elements as well as rows which had '0' or are empty in nature
- All of the mentioned
- None of the mentioned

Visual Programming

8. 5. Which of the following statement is correct about a string in C#.NET?

Mark only one oval.

- The System.Array class is used to represent a string
- A string has a zero-based index
- A number cannot be represented in the form of a string
- A string is mutable because it can be modified once it has been created

Visual Programming

9. 6. The Method use to remove white space from a string?

Mark only one oval.

- Split()
- Substring()
- Trim()
- TrimStart()

Visual Programming

10. 7. Statements about 'ref' keyword used in C#.NET are?

Mark only one oval.

- The ref keyword causes arguments to be passed by reference
- While using 'ref' keyword any changes made to the parameter in the method will be reflected in the variable when control is passed back to the calling method
- Ref usage eliminates overhead of copying large data items
- All of the mentioned

Visual Programming

11. 8. In C#.NET if we do not catch the exception thrown at runtime then which of the following will catch it?

Mark only one oval.

- CLR
- Operating System
- Loader
- Compiler

Visual Programming

12. 9. Which of these keywords is not a part of exception handling?

Mark only one oval.

- try
- finally
- thrown
- catch

Visual Programming

13. 10. Which of the following is the wrong statement about exception handling in C#.NET?

Mark only one oval.

- finally clause is used to perform cleanup operations of closing network and database connections
- a program can contain multiple finally clauses
- the statement in final clause will get executed no matter whether an exception occurs or not
- all of the mentioned

Visual Programming

14. 11. To use the .NET Framework Data Provider for SQL Server, an application must reference the _____ namespace.

Mark only one oval.

- System.Data.Client
- System.Data.SqlClient
- System.Data.Sql
- None of the mentioned

Visual Programming

15. 12. _____ object is used to fill a DataSet/DataTable with query results in ADO.net.

Mark only one oval.

- DataReader
- Dataset
- DataAdapter
- DataTables

Visual Programming

16. 13.The default property for a text box control is _____

Mark only one oval.

- Text
- Enable
- Multiline
- Password char

Visual Programming

17. 14.The method, which loads the form into memory and displays it on screen

Mark only one oval.

- Load
- Show
- Display
- All of these

Visual Programming

18. 15.MDI stands for _____

Mark only one oval.

- Multiple Design Interface.
- Multiple Document Interface.
- Manipulated Document Interface.
- Menu Design Interface.

Visual Programming

19. 16. _____ indicates whether a particular condition is on or off.

Mark only one oval.

- Text box
- Check box
- List box
- Combo box

Visual Programming

20. 17. Frame Control acts as a _____

Mark only one oval.

- Event
- Method
- Class
- Container

Visual Programming

21. 18. The _____ is a tool used for both the Input and output purpose.

Mark only one oval.

- label
- Combo box
- text box
- command button

Visual Programming

22. 19. The _____ property is used in C# for maximum form at run time.

Mark only one oval.

- caption
- window resize
- window status
- none of these

Visual Programming

23. 20. _____ is property is used to hide the content in textbox with some symbols.

Mark only one oval.

- Name
- Caption
- Hidden
- Password char
